

## Fixed Window screens

Window screens are used to prevent mosquitos from entering the room through windows. The supporting construction made of aluminum is corrosion resistant and long-lasting. Window screens will protect from flying insects getting inside your home so you can enjoy fresh air and mosquito free environment.

## Technical specifications

- Stable and robust frame profile keeps the net tightly stretched through the entire area of the frame
- Installation of window screen does not damage the window
- Available colors: Intus screens are selected to match the exterior laminate color as closely as possible
- Fixed window screen net available colors: grey, black
- It is not recommended to uninstall screens in cold season
- The net has to be cleaned occasionally for better ventilation

# Installation

- Fixed window screen are installed from the inside only (using rubber covered hooks)
- Screen aluminum frame overlaps a little portion of the windows frame
- Screens have hooks that go over the first seal
- Hooks are covered with rubber to protect the seal
